

# Science That Wins Cases.

Independent accredited laboratory testing and court-ready expert witness reports — from the same team, under one roof. Built for law firms that can no longer afford to cobble together the evidence they need.

50,000+

HOUSING DISREPAIR CLAIMS/YEAR — UP FROM 6,500 IN 2019

14 days

MAX LANDLORD INVESTIGATION WINDOW UNDER AWAAB'S LAW (DEC 2024)

100%

CLIENT RETENTION — EVERY CLIENT WE'VE WORKED WITH HAS RETURNED

**Awaab's Law changed everything.** In December 2020, two-year-old Awaab Ishak died in Rochdale from a respiratory condition caused by prolonged mould exposure in his social housing. The subsequent coroner's verdict and the Social Housing (Regulation) Act 2023 created a legal landmark.

Since December 2024, every registered social landlord must **investigate damp and mould within 14 days**, fix emergency hazards within 24 hours, and non-emergency repairs within 7 days. Every failure is now directly actionable.

Claims have grown from approximately **6,500 per year in 2019 to over 50,000 today** — and rising. Every case requires independent scientific evidence.

## THE PROBLEM FOR LAW FIRMS

Most firms handling housing disrepair, criminal defence, and family law cases are relying on fragmented arrangements — a commercial testing lab here, an independent expert witness there. Different organisations, different timelines, inconsistent chain of custody.

## WHAT HH GLOBAL PROVIDES

- Independent mould, mycotoxin, and fungal identification — accredited laboratory testing
- Expert witness reports for housing disrepair and Awaab's Law cases
- Forensic drug testing — criminal defence and family law proceedings
- EWS1, cladding, and building standards scientific evidence
- Environmental contamination and indoor air quality assessment
- Full chain of custody — lab testing and expert opinion, one team

"One 12-minute talk at Legal Futures generated a 78% increase in LinkedIn profile searches in a single week. The demand is there. We're now building the commercial partnerships to meet it."

— Dr Samuel White, CEO, HH Global Holdings

## THE PEOPLE BEHIND THE REPORTS

When a case goes to court, the expert's credentials are challenged before the science is. Ours are not challenged easily.

### Prof Philippe B. Wilson

EXECUTIVE CHAIRMAN · HH GLOBAL HOLDINGS

- ★ **Forbes 30 Under 30** — Healthcare & Science (2018)
- ★ NHS Chief Scientific Officer, NHS Willows Health (largest Primary Care Network in NHS Leicestershire)
- ★ Professor of One Health, York St John University
- ★ Government advisor — DEFRA Genetics Committee; PHE/FSA Committee on Toxicity
- ★ Led AstraZeneca TACKLE clinical trial unit (COVID-19)
- ★ Fellow: Royal Society of Biology · Royal Society of Medicine · Linnean Society
- ★ 1,566+ peer-reviewed citations

### Dr Samuel J. White

- ★Applied immunologist — mould, allergens, and biomarker identification
- ★Former Associate Professor & Head of Projects, Nottingham Trent University
- ★Forensic diagnostics, chain-of-custody lab testing
- ★Expert witness — housing disrepair, drug testing, environmental health
- ★Legal Futures speaker — 78% LinkedIn uplift from single talk
- ★Research collaboration with University of Bern (immunotherapy)

HH Global operates from Nottingham Science Park — a fully equipped wet laboratory with ISO 17025 accreditation pathway. Not a paper exercise.  
Real science, real scientists, real results.
